Taipei, Taiwan – CTC Union Technologies, a leading designer and manufacturer of telecommunications, data communications and industrial grade networking products, today launches a new **Industrial 4G LTE Gateway**.

CTC Union's ICR-W401 is a compact, lightweight and cost-effective Industrial grade 4G LTE gateway that has 1 LAN plus 1 WAN Fast Ethernet connection and supports uplink to 2G/3G/4G mobile data networks. ICR-W401 is equipped with a single RS232 serial port and a DI/DO interface and it's WiFi is compliant with IEEE 802.11b/g/n wireless connectivity.

The ICR-W401 features VPN Tunneling with Firewall and management capability via TR069 and SNMP. The ICR-W401 provides a highly secure authentication, encryption and management to protect your data between public and private networks and simplify your complicated solutions for smart city and industrial networking.

The ICR-W401 is simple to configure through its embedded Web user interface and can be deployed where the collection of real-time data transmissions is required for Industrial IoT and M2M (machine-to-machine) applications. Such as smart vending machine system which demands high stability networks, it provides uninterrupted and real-time data transmission between vending machine, office and delivering truck. Besides, ICR-W401 offers a wide operating temperature from -40 to +75°C and have certifications for using in harsh environment. With these features, CTC Union's ICR-W401 enables not only operators to remotely monitor sales conditions but manage stock and logistics efficiently (See Figure).
